

Why being a PRINTO member

As a PRINTO member you will be actively involved in the projects developed and coordinated by the network that result in international publications.

In 2017 PRINTO has reached more than **1600** members in **600** centres from **87** countries worldwide.

If you wish to become a PRINTO member and receive regular updates about our research activity and invitations to our projects please go to:

www.printo.it/contact/apply-membership

Your cooperation will be more than welcome and your effort will be essential for the research in the field of paediatric rheumatic diseases.

PRINTO

Paediatric Rheumatology International
Trials Organisation

Chairman

Alberto Martini, MD, Prof - Genoa, Italy

Senior Scientist

Nicolino Ruperto, MD, MPH - Genoa, Italy

Counsellors

Tadej Avcin, MD, PhD - Ljubljana, Slovenia

Michael Hofer, MD, Prof - Lausanne,
Switzerland

Seza Ozen, MD, Prof - Ankara, Turkey

Pierre Quartier, MD - Paris, France

Claudia Saad Magalhães, MD, Prof - Botucatu,
Brazil

Joost Swart, MD - Utrecht, The Netherlands

What PRINTO is

PRINTO short history

The Paediatric Rheumatology INternational Trials Organisation (PRINTO at www.printo.it) is a not for profit, non-governmental, international research network founded by Alberto Martini and Nicolino Ruperto in 1996. PRINTO initially included 14 European countries (about 60 countries, 550 centres worldwide with 1200 members today), with the goal to foster, facilitate and co-ordinate the development, conduct, analysis, and reporting of multi-centres, international clinical trials and/or outcome standardisation studies in children with paediatric rheumatic diseases (PRD).

PRINTO also fosters the training of young fellows in Pediatric Rheumatology through different education fellowship programs.

PRINTO coordinating centre

The International Coordinating Centre is based in Genoa at the Istituto Giannina Gaslini, one of the biggest children's hospital in Italy. The chief function of the International Coordinating Centre is to facilitate the flow of logistic and scientific details needed to design, launch and manage multi-centred, multi-national, collaborative studies.

The PRINTO Academic Research Activities

PRINTO acts as an international academic research service to the paediatric rheumatology community for the implementation of non-for profit trials and other investigator's initiated studies (consensus projects, cross-cultural adaptation of questionnaires, training, standardized information to families etc).

Many projects coordinated by the network have been funded by the European Union or other public bodies (The Methotrexate trial in JIA ,The quality of life project for the PRD, JDM and JSLE diagnosis criteria, A website for families of children with pediatric rheumatic diseases, Research Training in pediatric rheumatology, Pharmachild registry, Abirisk registry, INSAID and EuroFever registry).

These are the ongoing projects coordinated by the network:

- **Pharmachild:** pharmacovigilance JIA registry;
- **Eurofever:** registry of patients (children and adults) with autoinflammatory diseases;
- **EPOCA:** epidemiology and outcome of children with JIA around the world;
- **Abirisk:** evaluation of the presence of antibodies against biologic drugs in JIA;
- **Share:** update of the families' website containing information on pediatric rheumatic diseases, on pediatric rheumatology centers and on family associations;
- **MyPan:** randomised trial on childhood polyarteritis nodosa.

As a result of academic initiatives a total of over **37,500** patients have been enrolled from about **300 centres** in **67** different countries.

Collaboration with pharmaceutical companies

PRINTO collaborates with several pharmaceutical companies in the pediatric investigation plan (PIP), protocol and case report form development, site selection through dedicated feasibility studies among PRINTO members, training, monitoring, analysis and reporting of clinical trials

As a result of this collaboration over **3,000** patients have been enrolled from more than **250** centres in **39** different countries.

Publications A total of over 135 manuscripts have been published with over 685 authors with 40% of them in multiple publications.

PRINTO for Families PRINTO has created a dedicated website

www.printo.it/pediatric-rheumatology

that offers scientific information regarding the pediatric rheumatic diseases (PRD), the list of centres dealing with PRD, and the list of the family associations in more than 60 languages. The information reported in the website allow the families to have a clear picture of the current standards of care of the patients affected by pediatric rheumatic diseases.
