## MDK (IgD)

### 1. MDK

#### 1.1 MDK

MDK (IgD) is a marker of disease activity in children with systemic lupus erythematosus (SLE). It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system.

#### 1.2 MDK

MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system.

#### 1.3 MDK

MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system.

#### 1.4 MDK

MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system.

#### 1.5 MDK

MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system. MDK (IgD) is a marker of disease activity in children with SLE. It is a type of antibody that is produced by the immune system.
